

HEUCOSIL™ CSA AND CSM

A new generation of highly effective Anticorrosives for Coil and Thin-film applications

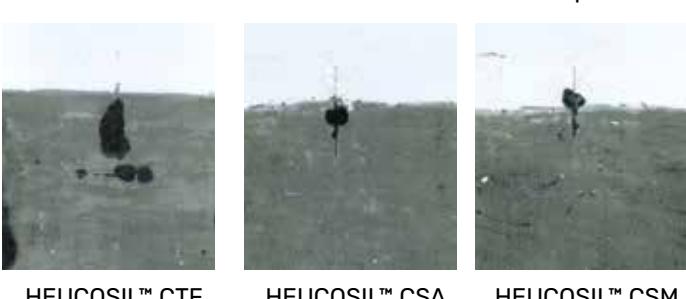

PROPERTIES:

- After the successful story of HEUCOSIL™ CTF we now present our new silica ion-exchange pigments HEUCOSIL™ CSA and HEUCOSIL™ CSM.
- HEUCOSIL™ CSA is an aluminum modified and HEUCOSIL™ CSM is a magnesium modified silica gel with an outstanding corrosion protection performance meeting the specific requirements for thin-film applications.
- Key benefits are a low oil absorption, reduced blistering, and pH-stabilizing effects due to the basic components. Compared to phosphate-based pigments they exhibit different chemical and physical behavior.
